PROJECTS

IPL Website

- Link – https://shilpisonwani1995.github.io/IPL_Webpage/
- Display team cards, teams and players dynamically, add a search functionality to search team name and player name. for this function I use js.

Vagen Plant web

- Link - <https://shilpisonwani1995.github.io/PlantVagen.com/>
- This is user interface only. There is no functioning. Use only HTML and CSS. It is plant base product app. Where all product show and we can order that product

Random Jokes Web

- Link – https://shilpisonwani1995.github.io/Random_jokes/
- Create random number of jokes by using javascript. Fetch the joke from URL. there is a button we give onclick function on that. When we click the button it select any random number of joke from list

Hacker Type

- Link – https://shilpisonwani1995.github.io/HackerTyper_web/
- There is a list of message. There is a function display message one by one with 2second delay. The whole thing is fictional representation. It meant for entertainment and education purpose.
